

PRITISH KUMAR PANDA

Backend Developer · Node.js · Express.js · MongoDB · REST APIs · MERN Stack

prishpanda157@gmail.com · +91-6372591970 · prish-dev.vercel.app · linkedin.com/in/prish-kumar-panda-dev · github.com/prish157

PROFESSIONAL SUMMARY

Backend-focused full-stack developer (B.Tech CSE, 2026) with hands-on experience designing and shipping production-grade Node.js/Express REST APIs across three MERN stack applications. Skilled in secure API architecture, JWT and TOTP 2FA authentication, MongoDB schema design, indexing, and aggregation pipelines, real-time systems with Socket.io, and payment gateway integration (Razorpay). Experienced with GitHub Actions CI/CD, Docker, and Agile delivery workflows. Seeking a Backend or Full-Stack Developer role where strong server-side engineering, API design, and database optimisation skills can drive reliable, scalable product outcomes.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Core Java, Python, SQL
Backend:	Node.js, Express.js, REST API Design, JWT Auth, TOTP 2FA, OAuth, Socket.io (real-time), NodeMailer, Middleware Architecture
Databases:	MongoDB (schema design, indexing, aggregation pipelines, query optimisation), Mongoose ODM, MySQL
Frontend:	React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS (supporting role)
Testing:	Jest, Supertest — unit & integration testing of REST endpoints
DevOps & Tools:	Git, GitHub, GitHub Actions (CI/CD), Docker, Docker Compose, Vercel, Render, Linux CLI
Integrations:	Razorpay (orders, checkout, verification, refunds, webhooks), Cloudinary, ImageKit, LLM APIs

PROJECTS

Knot of Love – Matrimonial Platform

[knot-of-love.vercel.app](#) · [github.com/prish157/knot-of-love](#)

- Architected and implemented **40+ REST API endpoints** (auth, user profiles, media, admin) with role-based access control for Admin, User, and Guest roles using Node.js/Express.js.
- Designed and enforced secure authentication: **JWT session management + TOTP 2FA** with time-based OTP verification, protecting all sensitive routes.
- Engineered real-time chat and notification system using **Socket.io**; integrated Cloudinary and ImageKit for media upload, transformation, and CDN delivery.
- Applied **MongoDB indexing and query optimisation** across profile and search collections to improve data retrieval consistency and reduce query overhead.
- Configured **GitHub Actions CI/CD pipeline** for automated testing and deployment to Render, enabling fast, repeatable production releases.

Vireon – Event Management Platform

[vireon-swart.vercel.app](#) · [github.com/prish157/vireon](#)

- Built **10+ Express.js REST endpoints** with optimised query logic, response shaping, and error handling for event listings, bookings, and admin operations.
- Integrated **Razorpay end-to-end**: order creation, checkout session, payment verification, refund processing, and webhook handling for async payment events.
- Designed a **two-stage seat reservation flow** with server-side validation to handle concurrent booking edge cases and prevent overbooking.
- Implemented **NodeMailer OTP** for account activation and booking confirmation emails; deployed continuously via GitHub Actions CI/CD.

AstroAgent – AI-Powered Conversational Assistant

[astro-agent-wheat.vercel.app](#) · [github.com/prish157/AstroAgent](#)

- Built a **Node.js/Express backend** to orchestrate LLM API calls, manage session-based query history, and serve structured responses to the frontend.
- Designed API middleware for request validation, error handling, and rate-aware LLM prompt orchestration; wrote **Jest unit tests** for endpoint logic.

PROFESSIONAL EXPERIENCE

Application Developer Intern — Rooman Technologies Pvt Ltd, Bangalore

Jan 2026 – May 2026

- Built and integrated Node.js/Express backend features and React.js UI components end-to-end across the MERN stack within an Agile development team.
- Contributed to REST API development, participated in code reviews, and iterated on features through sprint cycles — prioritising code quality and timely delivery.
- Applied Java/JDBC for database-layer tasks; built working knowledge of HTTP/TCP-IP/DNS fundamentals to support reliable client-server communication in shipped features.

Web Development Intern — PMEC, Berhampur

May 2024 – Aug 2024

- Integrated REST APIs and managed client-server data flow for dynamic, data-driven institutional web modules, ensuring reliable backend-to-frontend communication.
- Built responsive web interfaces across devices; collaborated with faculty stakeholders to iterate on requirements and deliver working features within deadlines.

EDUCATION

B.Tech in Computer Science & Engineering

Parala Maharaja Engineering College (PMEC), Odisha
2022 – 2026

CERTIFICATIONS

- Complete Web Development Bootcamp — Udemy
- Web Development Internship Certificate — PMEC, Berhampur
