

PRITISH KUMAR PANDA

Java | MERN Stack | Backend | AI-Oriented Developer

Bhubaneswar, Odisha | pritishpanda157@gmail.com | +91-6372591970
github.com/pritish157 | https://pritish-dev.vercel.app | linkedin.com/in/pritish-kumar-panda-dev

Professional Summary

Full-stack developer focused on backend-intensive products using MERN stack and Java. Experienced in REST APIs, authentication, database optimization, real-time systems, and AI-driven integrations. Interested in scalable architecture, microservices, distributed systems, and performance-oriented backend engineering for product teams.

Technical Skills

Languages: Python, JavaScript, C, Java

Frontend: React.js, Tailwind CSS, Bootstrap, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT, OAuth, TOTP (2FA), Socket.io, NodeMailer

Databases: MongoDB, MySQL, Query Optimization, Schema Design

Tools: Git, GitHub, Postman, Docker, Linux, VS Code

AI/ML Exposure: OpenAI APIs, Prompt Engineering, Basic ML Integration

Experience

Java Developer Intern

Rooman Technologies Pvt Ltd

Jan 2026 – May 2026

Bangalore, Karnataka

- Engineered backend modules for Java applications, improving API response efficiency by ~25% through cleaner service logic and structured data flows.
- Designed optimized database queries that reduced redundancy and improved retrieval time for core application workflows.
- Collaborated in Agile sprints with Git-based workflows, code reviews, and structured issue tracking to improve release stability.

Web Development Intern

PMEC

May 2024 – Aug 2024

Berhampur, Odisha

- Built responsive web interfaces that improved user interaction, accessibility, and consistency across desktop and mobile views.
- Implemented REST API integrations and managed client-server communication for dynamic data-driven modules.

Projects

Matrimonial Web Application

<https://knot-of-love.vercel.app>

React.js, Node.js, Express.js, MongoDB, JWT, Socket.io,

Multer, Cloudinary, ImageKit

- Engineered a full-stack matchmaking platform with user profiles, preferences, compatibility workflows, and admin moderation in a scalable architecture.
- Implemented JWT-based authentication with 2FA-oriented flows, strengthening session security and protected route access.
- Built 15+ REST API endpoints for authentication, profiles, uploads, verification, and dashboard operations using modular Express services.
- Integrated Socket.io for real-time updates and notifications across profile interactions and system events.
- Built a scalable media pipeline using Multer, Cloudinary, and ImageKit for reliable asset handling.
- Optimized MongoDB queries and indexing strategy, improving backend performance by ~30% under simulated load.
- Developed an admin dashboard for verification, moderation, and monitoring.

Vireon – Event Management Platform

<https://github.com/pritish157/vireon>

Node.js, Express.js, MongoDB, Tailwind CSS,

JWT, NodeMailer

- Developed a full-stack event platform for creation, registration, scheduling, and user management.
- Implemented authentication and role-based access control for secure event and admin operations.
- Designed 10+ REST API routes for users, events, registrations, and authentication.
- Integrated NodeMailer for automated email notifications, improving user engagement.
- Optimized backend workflows for concurrent users and better data consistency.

Education

B.Tech in Computer Science and Engineering

Parala Maharaja Engineering College (PMEC)

2022 – 2026

Odisha

Certifications

- Complete Web Development – Udemy
- Web Development Internship – PMECC
